SUBJECT INDEX

(Volume 21)

aluminum 26 39
amino acid 119, 129, 317
anhydrobiotic organisms 177
aspartic acid 219, 243
asteroids 339
atmosphere's origin 279
ATP 31

Bacillus subtilis spores 177

carbonaceous chondrites 375
CCO 399
chirality 407
  review 59, 119
CHON particle 299
circularly polarized light 407
citric acid cycle 219
comets 39, 267
  collisions 267
  dust 267
  impacts 267
  life's origins 267
  nuclei 267
  organics 267
  water 267
comma-less theory 251
computer modeling 39, 359
cosmic rays 39, 359
cosmogeochromatography 375
creationism 1

deamination 129
decarboxylation 129, 145
decarboxylation, oxidative 219
Deinoccus radiodurans 177
diketopiperazine 113, 129
discharge 2
  coronal 2
  electrical 2
  point 2
DNA 225
  cobalt(3+) complex 225
  encapsulated 225
  spermidine complex 225
DNA strand breaks 177

dust 299
dust accretion 279

Earth-Moon system 267
enantiomeric, amplification 407
enantiomeric, excess 407
encapsulation 225
excess siderophiles 279
excess volatiles 279
exobiology 189
extreme dryness 177

Fisher-Tropsch 375
formaldehyde 39

genetic code 165, 251
glutamic acid 219

H_2C_3O 399
Halley's comet 421
HCN 421
heterocopolymers 243
  amino acids 243
  aspartic 243
  proline 243
homochirality 359, 407
hydrogen cyanide 421
hydrogen peroxide 157
hydroxycarboxylic acids 19

impacts 339, 385
interplanetary dust 339
interstellar clouds 399
interstellar molecules 399
ionizing radiation 39
isotope ratios 19

K/T boundary 317
ketene 399
kinetics 39

late accretion 267
life detection concepts 255
life survival 177
lightning 2

liposomes 225

malonic acid 219
Mars 177, 189
  basins 189
  biological artifacts 255
  channels 189
  environments 189
  floods 189
  gas chromatograph-mass spectrometer experiment 255
  gas exchange experiment 255
  labeled release experiment 255
  life 189
  life detection concepts 255
  paleolakes 189
  pyrolytic release experiment 255
  sample return 255
  specialized environment 255
  Viking biology 255
  water 189
mass spectrometry 385
meteorites 375, 385
meteoroids 339
microspheres 31, 243
Miller-Urey 375
monocarboxylic acids 19
Murchison 385
Murchison meteorite 19
  organics 385
  shocked 385

neutron star 407
nucleophiles 199
nucleotides 199

ocean's origin 279
oligoglycine 113
oligopeptides 113
organics 2
ornithine 145

PAH's 375
parent body 19
peptide 113
peptide-RNA 165
phosphate catalysis 113
phosphorimidazolide 199
  adenosine 199
  guanosine 199
  kinetics 199
photolysis 219, 407
  asymmetric 407
photophosphorylation 31
photosynthesis 157
  abiotic 157
  evolution 157
  oxygenic 157
planet formation 385
plasma 2
  cold 2
  hot 2
polyamidines 421
polyamines 145
polycondensation 119
polycyclic aromatic hydrocarbons 375
polymers 299
polypeptides 421
precellular 225
presolar molecular cloud 19
primary photosensitizers 31
primordial atmosphere 385
proline 243
protein synthesis 165
proteinoids 31
putrescine, prebiotic synthesis 145
pyrophosphate, dinucleoside 199

radiation 359
radiation-induced decomposition 39
radiolysis 359
radionuclides 359
riboflavin 31
RNA 251
RNA catalysis 165
RNA, peptidyl 165
RNY 251

sequence analysis 251
silica catalysis 119, 129
Strecker synthesis 19
sublimation 129
succinic acid 219
supernova 407

Taurid complex 339
vacuum exposure 177
